REASON FOR ALLOWANCE

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Ollmar (US 5,353,802) discloses a device for measurement of electrical impedance of organic and biological materials. Davis (US 4,951,683) discloses a device for detecting keratoconjunctivitis sicca. Eggers et al (US 5,891,095) discloses electrosurgical treatment of tissue in electrically conductive fluid.
2. The following is an examiner's statement of reasons for allowance: allowance of claims 17-24 is indicated because the prior art of record does not show or suggest an inner core having a first surface, a second surface substantially parallel to said first surface and at least one side surface connecting said first and second surface, said first surface having a set of electrodes mounted thereon, said second surface having a recessed portion, said recessed portion connecting to said substantially hollow portion of said inner core, a hollow pusher/plunger having one end thereof engaging said recess formed on said second surface, said electrical conductors connected to said conductive plates extending from said recessed portion into said hollow pusher/plunger and extending inside said hollow pusher/plunger; a first sheath covering at least a portion of said inner core, said first sheath having an opening at an end co-located to said first surface for exposing said set of electrodes, and a second sheath covering said first sheath, said inner core and at least covering a portion of said hollow pusher/plunger, said second sheath having an opening at an end co-located to said first surface for exposing said set of electrodes as recited in claims 17-24.
